

2010 Mathematics Subject Classification index

Volume 12, 2025

- 28A35** S.M. Tzaninis, N.D. Macheras, [A change of measures technique for compound mixed renewal processes with applications in Risk Theory](#), 471
- 33E12** A. Iuliano, C. Macci, A. Meoli, [Noncentral moderate deviations for time-changed Lévy processes with inverse of stable subordinators](#), 203
- 34G20** L. Shaikhet, [About stability of equilibria of one system of stochastic delay differential equations with exponential nonlinearity](#), 313
- 34K20** L. Shaikhet, [About stability of equilibria of one system of stochastic delay differential equations with exponential nonlinearity](#), 313
- 34K50** L. Shaikhet, [About stability of equilibria of one system of stochastic delay differential equations with exponential nonlinearity](#), 313
- 37H15** J.L. Kirkby, D.H. Nguyen, D. Nguyen, [Moments of Student's t-distribution: a unified approach](#), 393
- 60A10** S.M. Tzaninis, N.D. Macheras, [A change of measures technique for compound mixed renewal processes with applications in Risk Theory](#), 471
- 60E05** M. Skorski, [Handy formulas for binomial moments](#), 27
K. Barman, N.S. Upadhye, P. Vellaisamy, [Approximations related to tempered stable distributions](#), 325
- 60E07** K. Barman, N.S. Upadhye, P. Vellaisamy, [Approximations related to tempered stable distributions](#), 325
- 60F05** A. Iuliano, C. Macci, A. Meoli, [Noncentral moderate deviations for time-changed Lévy processes with inverse of stable subordinators](#), 203
- 60F10** A. Iuliano, C. Macci, A. Meoli, [Noncentral moderate deviations for time-changed Lévy processes with inverse of stable subordinators](#), 203
G. Högnäs, B. Jung, [Exit times for some nonlinear autoregressive processes](#), 375

- 60F15** R. Giuliano, M. Hadjikyriakou, [Strong laws of large numbers for lightly trimmed sums of generalized Oppenheim expansions](#), 273
 A. Iksanov, R. Kostohryz, [Limit theorems for random Dirichlet series: boundary case](#), 347
- 60F17** D. Krizmanić, [Skorokhod \$M_1\$ convergence of maxima of multivariate linear processes with heavy-tailed innovations and random coefficients](#), 251
 A. Iksanov, R. Kostohryz, [Limit theorems for random Dirichlet series: boundary case](#), 347
- 60G17** B. Manikin, [Heat equation with a general stochastic measure in a bounded domain](#), 61
 V. Radchenko, [Regularity of paths of stochastic measures](#), 189
 O. Hopkalo, L. Sakhno, [Investigation of sample paths properties of sub-Gaussian type random fields, with application to stochastic heat equations](#), 289
 G. Högnäs, B. Jung, [Exit times for some nonlinear autoregressive processes](#), 375
- 60G18** M. El Omari, [Statistical inference for \$n\$ th-order mixed fractional Brownian motion with polynomial drift](#), 169
- 60G22** M. El Omari, [Statistical inference for \$n\$ th-order mixed fractional Brownian motion with polynomial drift](#), 169
 A. Iuliano, C. Macci, A. Meoli, [Noncentral moderate deviations for time-changed Lévy processes with inverse of stable subordinators](#), 203
- 60G44** Y. Dolinsky, D. Greenstein, [A note on optimal liquidation with linear price impact](#), 123
 S.M. Tzaninis, N.D. Macheras, [A change of measures technique for compound mixed renewal processes with applications in Risk Theory](#), 471
- 60G50** A. Iksanov, R. Kostohryz, [Limit theorems for random Dirichlet series: boundary case](#), 347
- 60G52** M.V. Boiko and M.M. Osypchuk, [Perturbation of an \$\alpha\$ -stable type stochastic process by a pseudo-gradient](#), 1
 M. Barski, R. Łochowski, [On the reducibility of affine models with dependent Lévy factors](#), 433
- 60G55** S.M. Tzaninis, N.D. Macheras, [A change of measures technique for compound mixed renewal processes with applications in Risk Theory](#), 471
- 60G57** B. Manikin, [Heat equation with a general stochastic measure in a bounded domain](#), 61
- 60G60** S. Shklyar, [First-order planar autoregressive model](#), 83
 O. Hopkalo, L. Sakhno, [Investigation of sample paths properties of sub-Gaussian type random fields, with application to stochastic heat equations](#), 289

- 60G70** D. Krizmanić, Skorokhod M_1 convergence of maxima of multivariate linear processes with heavy-tailed innovations and random coefficients, 251
 R. Giuliano, M. Hadjikyriakou, Strong laws of large numbers for lightly trimmed sums of generalized Oppenheim expansions, 273
- 60H05** V. Radchenko, Regularity of paths of stochastic measures, 189
- 60H10** J.L. Kirkby, D.H. Nguyen, D. Nguyen, Moments of Student's t-distribution: a unified approach, 393
- 60H15** B. Manikin, Heat equation with a general stochastic measure in a bounded domain, 61
 O. Hopkalo, L. Sakhno, Investigation of sample paths properties of sub-Gaussian type random fields, with application to stochastic heat equations, 289
- 60J60** J.L. Kirkby, D.H. Nguyen, D. Nguyen, Moments of Student's t-distribution: a unified approach, 393
- 60K05** S. Losidis, K. Politis, G. Psarrakos, Bivariate dependence, stochastic orders and conditional tails of the recurrence times in a renewal process, 153
 S.M. Tzaninis, N.D. Macheras, A change of measures technique for compound mixed renewal processes with applications in Risk Theory, 471
- 60K10** S. Losidis, K. Politis, G. Psarrakos, Bivariate dependence, stochastic orders and conditional tails of the recurrence times in a renewal process, 153
- 62E17** K. Barman, N.S. Upadhye, P. Vellaisamy, Approximations related to tempered stable distributions, 325
- 62E20** K. Barman, N.S. Upadhye, P. Vellaisamy, Approximations related to tempered stable distributions, 325
- 62F03** S. Drin, S. Mazur, S. Muhinyuza, A test on the location of tangency portfolio for small sample size and singular covariance matrix, 43
- 62F05** S. Drin, S. Mazur, S. Muhinyuza, A test on the location of tangency portfolio for small sample size and singular covariance matrix, 43
- 62F10** M. El Omari, Statistical inference for n th-order mixed fractional Brownian motion with polynomial drift, 169
 J. Figueras, A. Persson, L. Viitasaari, On parameter estimation for $N(\mu, \sigma^2 I_3)$ based on projected data into $\mathbb{S}^2$, 407
- 62F12** M. El Omari, Statistical inference for n th-order mixed fractional Brownian motion with polynomial drift, 169
- 62H11** J. Figueras, A. Persson, L. Viitasaari, On parameter estimation for $N(\mu, \sigma^2 I_3)$ based on projected data into $\mathbb{S}^2$, 407
- 62M10** S. Shklyar, First-order planar autoregressive model, 83

- 62P05** S. Drin, S. Mazur, S. Muhinyuza, [A test on the location of tangency portfolio for small sample size and singular covariance matrix](#), 43
- 62P99** S. Drin, S. Mazur, S. Muhinyuza, [A test on the location of tangency portfolio for small sample size and singular covariance matrix](#), 43
- 91B06** S. Drin, S. Mazur, S. Muhinyuza, [A test on the location of tangency portfolio for small sample size and singular covariance matrix](#), 43
- 91B24** N. Shchestyuk, S. Tyshchenko, [Subdiffusive option price model with Inverse Gaussian subordinator](#), 135
- 91B70** M. Barski, R. Łochowski, [On the reducibility of affine models with dependent Lévy factors](#), 433
- 91G05** S.M. Tzaninis, N.D. Macheras, [A change of measures technique for compound mixed renewal processes with applications in Risk Theory](#), 471
- 91G10** S. Drin, S. Mazur, S. Muhinyuza, [A test on the location of tangency portfolio for small sample size and singular covariance matrix](#), 43
Y. Dolinsky, D. Greenstein, [A note on optimal liquidation with linear price impact](#), 123
- 91G20** N. Shchestyuk, S. Tyshchenko, [Subdiffusive option price model with Inverse Gaussian subordinator](#), 135
- 91G30** M. Barski, R. Łochowski, [On the reducibility of affine models with dependent Lévy factors](#), 433
- 91G60** N. Shchestyuk, S. Tyshchenko, [Subdiffusive option price model with Inverse Gaussian subordinator](#), 135
- 92D25** J.L. Kirkby, D.H. Nguyen, D. Nguyen, [Moments of Student's t-distribution: a unified approach](#), 393
