

Keywords index

Volume 13, 2026

- AP@k – 357
- area under the curve (AUC) – 57
- asymptotic growth – 169
- asymptotic normality – 1, 341

- bandwidth selection – 1

- cancellable American options – 83
- Caputo derivative – 303
- cauchy residue principle – 461
- Chinese restaurant process – 289
- classical risk model – 387
- compound Poisson approximation – 409
- confidence interval – 57
- continuous-time random walk – 149
- contractive operators – 387
- convolution of distributions – 409
- cyclic long memory – 505

- deficit at ruin – 387
- dcretization – 169
- diffusion – 387
- dynamic cutting – 531

- Erlang service distribution – 433
- Euler-Maruyama scheme – 531
- evaluation metrics – 357
- expectation and variance – 357
- extreme value index – 341

- family-wise scaling process – 195
- first-passage time – 149
- first-return time – 149
- fractional Brownian motion – 255, 303
- fractional diffusion – 149
- fractional integrals – 483
- fractional kinetics – 149
- fractional quasi-ergodicity – 39
- fractional Riesz-Bessel equations – 505

- game options – 83
- Gaussian processes – 483
- general branching process – 19
- general filtration – 117
- generalized backward stochastic
 differential equation – 117
- growing dimension – 375

- Hall class – 341
- Hermite process – 255
- Hill estimator – 341

- impact of the penalty – 83
- information retrieval – 357
- inverse mixed stable subordinator – 433
- iterated perturbed random walk – 19

- $\mathbb{L}^p$ -solution – 117
- Langevin equation – 169
- large deviations – 483

- LaTeX – 275
- law of the iterated logarithm – 19
- least squares estimator – 169
- Lévy basis – 225
- Lévy process – 39
- Lévy-driven SDE – 531
- local linear regression – 1
- logistic regression – 57
- long-range dependence – 195, 225
- MAP@k – 357
- Matérn kernel – 505
- matrix Mittag-Leffler function – 461
- Mittag-Leffler function – 433
- mixture with varying concentrations – 1
- multiscaling limit theorems – 505
- multiset – 289
- nonparametric regression – 1
- optimal boundaries – 83
- optimal strategies – 83
- Ornstein–Uhlenbeck – 255
- Ornstein–Uhlenbeck process – 225
- parameter estimation – 255
- phase type distribution – 461
- pseudo-Poisson process – 195
- quasi-ergodicity – 39
- quasi-mixing limit – 39
- queueing system – 461
- random metric space – 375
- random partial differential equations – 505
- random permutations – 289
- random rankings – 357
- random walk – 375
- ranking algorithms – 357
- receiver operating characteristic (ROC) – 57
- recommendation systems – 357
- reproducing kernel Hilbert spaces – 483
- ruin probability – 387
- self-decomposable distribution – 225
- semi-Markov processes – 275
- shot-noise process – 225
- Sparre Andersen theorem – 149
- spectral – 39
- spectral density – 195
- spectral singularities – 505
- state probabilities – 433
- stochastic functional differential equation – 303
- stochastic Lipschitz generators – 117
- stochastic monotone generators – 117
- strong consistency – 169
- submartingale condition for weak convergence – 275
- sums of random vectors – 409
- tempered fractional process – 169
- the first uniform Kolmogorov theorem – 409
- time delay – 303
- total variation metric – 409
- U-statistics – 57
- viability – 303
- weak convergence of probability measures – 275
- Wiener chaos – 255
