

2020 Mathematics Subject Classification index

Volume 13, 2026

- 26A33** R.B. Pote, K.K. Kataria, [On mixed time-changed Erlang queue](#), 433
- 30E20** R.K. Singh, V. Vijay, [On Matrix Mittag Leffler distribution of PH/PH/1 system](#), 461
- 33E12** R.K. Singh, V. Vijay, [On Matrix Mittag Leffler distribution of PH/PH/1 system](#), 461
- 34F05** B. Elmansouri, M. El Otmani, [\$\mathbb{L}^p\$ -solution of generalized BSDEs in a general filtration with stochastic monotone coefficients](#), 117
- 35R60** B. Elmansouri, M. El Otmani, [\$\mathbb{L}^p\$ -solution of generalized BSDEs in a general filtration with stochastic monotone coefficients](#), 117
- 37A30** Y.X. Wu, H.J. Zhang, H.S. Li, [Exponentially quasi-mixing limits for killed symmetric Lévy processes](#), 39
- 42A38** T. Zaeviski, [On the impact of the penalty on the cancellable American options](#), 83
- 45R05** J. Han, Y. Sun, L. Yan, [Viability for time fractional functional differential equations driven by the fractional Brownian motion](#), 303
- 47D07** Y.X. Wu, H.J. Zhang, H.S. Li, [Exponentially quasi-mixing limits for killed symmetric Lévy processes](#), 39
- 60B10** V. Golomoziy, [Submartingale condition for weak convergence for semi-Markov processes](#), 275
- 60C05** D. Stark, [A Chinese restaurant process for multiset permutations](#), 289
T.V. Manzhos, T.O. Ianevych, O.O. Melnyk, [Average precision at cutoff k under random rankings: expectation and variance](#), 357
- 60E05** T.V. Manzhos, T.O. Ianevych, O.O. Melnyk, [Average precision at cutoff k under random rankings: expectation and variance](#), 357

- 60F05** D. Stark, [A Chinese restaurant process for multiset permutations](#), 289
M. Vaičiulis, [The generalization of several classical estimators for a positive extreme value index](#), 341
B.J. Jin, [Convergence of random walks in \$\ell_p\$ -spaces of growing dimension](#), 375
S. Khan, A. Olenko, [Multiscale asymptotic analysis of kernel-smoothed solutions to fractional Riesz-Bessel equations with random initial conditions](#), 505
- 60F10** B. Pacchiarotti, M. Simoncelli, [Asymptotics for fractionally integrated Gaussian processes, with a focus on the Gauss-Markov case](#), 483
- 60F15** O. Braganets, [Laws of the iterated logarithm for iterated perturbed random walks](#), 19
- 60F25** Y.X. Wu, H.J. Zhang, H.S. Li, [Exponentially quasi-mixing limits for killed symmetric Lévy processes](#), 39
- 60F99** V. Čekanavičius, S. Jokubauskienė, [Multidimensional compound Poisson approximations for symmetric distributions](#), 409
- 60G10** N.N. Leonenko, A. Pepelyshev, [Simulation of supOU processes with specified marginal distribution and correlation function](#), 225
- 60G15** B. Pacchiarotti, M. Simoncelli, [Asymptotics for fractionally integrated Gaussian processes, with a focus on the Gauss-Markov case](#), 483
S. Khan, A. Olenko, [Multiscale asymptotic analysis of kernel-smoothed solutions to fractional Riesz-Bessel equations with random initial conditions](#), 505
- 60G18** E.A. Azzo, [On long-range dependent time series driven by pseudo-Poisson type processes](#), 195
- 60G22** E.A. Azzo, [On long-range dependent time series driven by pseudo-Poisson type processes](#), 195
J. Han, Y. Sun, L. Yan, [Viability for time fractional functional differential equations driven by the fractional Brownian motion](#), 303
B. Pacchiarotti, M. Simoncelli, [Asymptotics for fractionally integrated Gaussian processes, with a focus on the Gauss-Markov case](#), 483
- 60G40** T. Zaeviski, [On the impact of the penalty on the cancellable American options](#), 83
- 60G50** O. Braganets, [Laws of the iterated logarithm for iterated perturbed random walks](#), 19
B.J. Jin, [Convergence of random walks in \$\ell_p\$ -spaces of growing dimension](#), 375
V. Čekanavičius, S. Jokubauskienė, [Multidimensional compound Poisson approximations for symmetric distributions](#), 409

- 60G51** Y.X. Wu, H.J. Zhang, H.S. Li, [Exponentially quasi-mixing limits for killed symmetric Lévy processes](#), 39
V. Knopova, D. Platonov, [Convergence rates for Euler schemes of Lévy-driven SDE using dynamic cutting](#), 531
- 60G55** E.A. Azzo, [On long-range dependent time series driven by pseudo-Poisson type processes](#), 195
- 60G60** S. Khan, A. Olenko, [Multiscale asymptotic analysis of kernel-smoothed solutions to fractional Riesz-Bessel equations with random initial conditions](#), 505
- 60H05** B. Elmansouri, M. El Otmani, [\$\mathbb{L}^p\$ -solution of generalized BSDEs in a general filtration with stochastic monotone coefficients](#), 117
- 60H10** B. Elmansouri, M. El Otmani, [\$\mathbb{L}^p\$ -solution of generalized BSDEs in a general filtration with stochastic monotone coefficients](#), 117
J. Han, Y. Sun, L. Yan, [Viability for time fractional functional differential equations driven by the fractional Brownian motion](#), 303
V. Knopova, D. Platonov, [Convergence rates for Euler schemes of Lévy-driven SDE using dynamic cutting](#), 531
- 60H15** B. Elmansouri, M. El Otmani, [\$\mathbb{L}^p\$ -solution of generalized BSDEs in a general filtration with stochastic monotone coefficients](#), 117
S. Khan, A. Olenko, [Multiscale asymptotic analysis of kernel-smoothed solutions to fractional Riesz-Bessel equations with random initial conditions](#), 505
- 60H30** B. Elmansouri, M. El Otmani, [\$\mathbb{L}^p\$ -solution of generalized BSDEs in a general filtration with stochastic monotone coefficients](#), 117
- 60H35** V. Knopova, D. Platonov, [Convergence rates for Euler schemes of Lévy-driven SDE using dynamic cutting](#), 531
- 60J10** D. Stark, [A Chinese restaurant process for multiset permutations](#), 289
- 60J27** R.K. Singh, V. Vijay, [On Matrix Mittag Leffler distribution of PH/PH/1 system](#), 461
- 60J35** Y.X. Wu, H.J. Zhang, H.S. Li, [Exponentially quasi-mixing limits for killed symmetric Lévy processes](#), 39
- 60J65** T. Zaeveski, [On the impact of the penalty on the cancellable American options](#), 83
- 60J76** M. Dahlenburg, G. Pagnini, [First-return time in fractional kinetics](#), 149
- 60J80** O. Braganets, [Laws of the iterated logarithm for iterated perturbed random walks](#), 19

- 60K15** V. Golomoziy, [Submartingale condition for weak convergence for semi-Markov processes](#), 275
R.B. Pote, K.K. Kataria, [On mixed time-changed Erlang queue](#), 433
- 60K20** R.B. Pote, K.K. Kataria, [On mixed time-changed Erlang queue](#), 433
- 60K25** R.B. Pote, K.K. Kataria, [On mixed time-changed Erlang queue](#), 433
R.K. Singh, V. Vijay, [On Matrix Mittag Leffler distribution of PH/PH/1 system](#), 461
- 60K50** M. Dahlenburg, G. Pagnini, [First-return time in fractional kinetics](#), 149
- 62-04** D. Horbunov, R. Maiboroda, [Asymptotic normality of local linear regression estimator for mixtures with varying concentrations](#), 1
- 62F12** M. Vaičiulis, [The generalization of several classical estimators for a positive extreme value index](#), 341
- 62G05** D. Horbunov, R. Maiboroda, [Asymptotic normality of local linear regression estimator for mixtures with varying concentrations](#), 1
- 62G08** D. Horbunov, R. Maiboroda, [Asymptotic normality of local linear regression estimator for mixtures with varying concentrations](#), 1
- 62G20** D. Horbunov, R. Maiboroda, [Asymptotic normality of local linear regression estimator for mixtures with varying concentrations](#), 1
- 62G32** M. Vaičiulis, [The generalization of several classical estimators for a positive extreme value index](#), 341
- 62J12** J. Kampf, L. Vogel, I. Dykun, T. Rassaf, A. Mahabadi, [A new confidence interval based on the theory of U-statistics for the area under the curve](#), 57
- 62M10** E.A. Azzo, [On long-range dependent time series driven by pseudo-Poisson type processes](#), 195
- 62M15** E.A. Azzo, [On long-range dependent time series driven by pseudo-Poisson type processes](#), 195
- 62P10** J. Kampf, L. Vogel, I. Dykun, T. Rassaf, A. Mahabadi, [A new confidence interval based on the theory of U-statistics for the area under the curve](#), 57
- 62R07** T.V. Manzhos, T.O. Ianevych, O.O. Melnyk, [Average precision at cutoff k under random rankings: expectation and variance](#), 357
- 65C05** N.N. Leonenko, A. Pepelyshev, [Simulation of supOU processes with specified marginal distribution and correlation function](#), 225
- 68T05** T.V. Manzhos, T.O. Ianevych, O.O. Melnyk, [Average precision at cutoff k under random rankings: expectation and variance](#), 357
- 82C05** M. Dahlenburg, G. Pagnini, [First-return time in fractional kinetics](#), 149

- 91B30** L. Kanellopoulos, [Some continuity estimates for ruin probability and other ruin-related quantities](#), 387
- 91G99** L. Kanellopoulos, [Some continuity estimates for ruin probability and other ruin-related quantities](#), 387
